

Do you have a wheaten
who is 13½ years or
older?

Is your geriatric dog's
annual health testing in
the normal range?

***You and your dog
can help make a
difference for future
generations of
Wheatens!***

Dr. Meryl Littman and Dr. Paula Henthorn have identified mutations in two genes believed to be associated with PLN. To take their research further...and lead to a genetic test...they are looking for blood samples from normal geriatrics. DNA from these samples will be used to test their findings.

***Don't wait...
donate now!***

The Wheaten Geriatric Project

Lending a helping strand to future generations

For more information or to find out how to submit your dog's samples,
contact project chair Anna Marzolino
